transport

Sea freight services.

Sea freight is most commonly used when the dispatch and delivery points are not connected by land. Sea freight is often a cheaper option for shipments to European countries with maritime borders.

Rail transport from China.

Compared to sea freight, shipping goods from China by rail has certain advantages.

Speed

Approximately 2x
faster delivery time

High quality

Minimal handling
of goods

Reliable delivery

Train leaves on time and
reaches destination
without delay

We take care of your freight.

All our cargoes are insured up to the value stipulated by the CMR Convention.

Additional insurance for cargoes whose value exceeds that covered by CMR insurance.

Experts in oversized cargo transportation.

We offer a full range of services related to oversized and non-standard freight transport – we optimise land and sea freight routes by arranging special permits for route planning and development, as well as reducing transportation costs.

Warehousing services for a wide range of goods.

Our modern A-Class warehouses comply with all EU safety and technical standards. Apart from warehousing we also offer packaging and distribution services in the Baltics.
